

Electron Microscopy in Sciences University Konstanz – Department of Physics

In collaboration with Department of Physics at the University Konstanz, we are excited to host a ZEISS On Your Campus (ZOYC) workshop on October 6.

Convince yourself in this workshop how your work can benefit from the latest advances in electron microscopy. Learn how ZEISS scanning electron microscopes combine ultrahigh resolution imaging with the capability to perform advanced analytics while maintaining flexibility and ease-of-use. Benefit from high resolution, surface sensitive imaging and optical systems that ideally support them in obtaining the best analytical results.

Based on this, users from the University Konstanz will talk about first-hand experience for their applications with electron microscopes and will introduce you to the flexible instruments suited to a broad variety of applications in materials science, industrial labs and life sciences.

For scientists interested in electron microscopy related techniques there is no better option to get informed and to talk directly with the scientific experts and ZEISS staff, respectively. Please register until Sept 16, 2022.

Program:

- 10:30 Registration
- 11:00 Welcome
- 11:15 Session 1: Scanning Electron Microscopy
- 13:30 Session 2: Nanopatterning and Focussed Ion Beams
- 15:30 Session 3: Transmission Electron Microscopy
- 17:30 Barbecue

Venue:

University Konstanz – Department of Physics
Room A704
Universitätsstraße 10
78464 Konstanz

[Register here](#)

The Workshop is free of charge.
